

## AV 21P1NRR

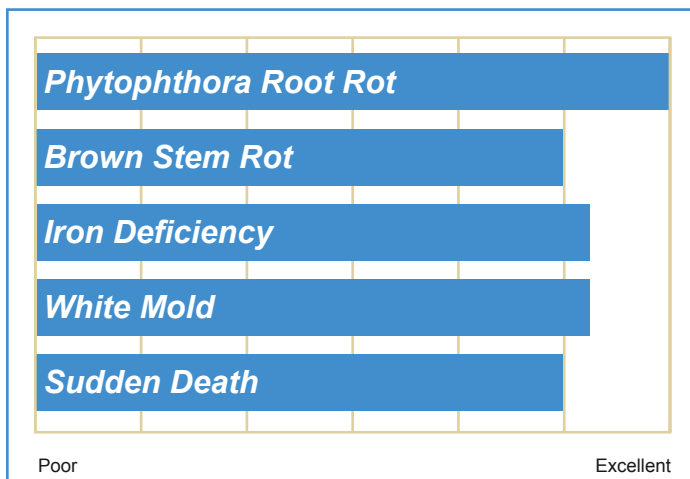

### 2.1 Day Relative Maturity

- ◆ New early Group II SCN release
- ◆ "K" gene for Phytophthora Root Rot
- ◆ Good tolerance to Iron Deficiency Chlorosis
- ◆ Full plant type with nice medium seed size

### Characteristics

|              |           |
|--------------|-----------|
| Plant Height | Medium    |
| Plant Width  | Medbush   |
| Flower       | Purple    |
| Hilum        | Imp Black |
| Pubescence   | Gray      |
| Pod          | Brown     |

### Disease Resistance

### Agronomics

### Management Recommendations

|                       |      |
|-----------------------|------|
| Irrigation            | ++++ |
| No Till               | ++++ |
| Wide Rows             | ++++ |
| Narrow Rows           | +++  |
| Higher Populations    | ++   |
| Lower Populations     | ++++ |
| High Organic          | ++++ |
| Clay and Variable     | ++++ |
| Light and Sandy Soils | +++  |

++++ = excellent, +++ = good, ++ = fair, + = poor
